

OPERATION MANUAL T330 LUPAX

① [PTT] PTT Switch

Push and hold to transmit; release to receive.

In menu operation, press [PTT] to quit the setting and return to the standby mode.

② [SCAN], [MONI] Key

Short press: enter / exit the scan;

Long press: enter / exit the monitor.

③ [POWER] Key

Press and hold to turn the power ON or OFF.

④ [▲] / [▼] UP / DOWN Keys

In standby mode, press[▲] / [▼] or rotate the channel selector to select the operating channel or frequency.

In menu mode, press[▲] / [▼] or rotate the channel selector to select the menu item or change the item value.

⑤ [MENU] Key

Short press:

(1) In standby mode, press to enter into the menu mode;

(2) In menu mode, press to enter into the menu selection or confirm the menu item.

Long press: lock or unlock the keypad.

⑥ EXT DC Jack

Connect the adaptor for charging.

⑦ LED Indicator

The LED lights red while transmitting; lights green while receiving.

While transmitting, the LED flashes red for low battery power.

⑧ Channel Selector

In standby mode, rotate it to select the operating channel or frequency.

In menu mode, rotate it to select the menu item or change the item value.

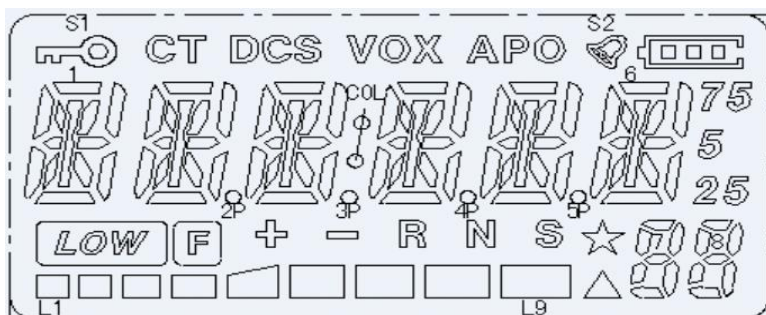

⑨ VOL Switch

Rotate to adjust the volume level.

⑩ SP/MIC Jack

Connect an external SP/MIC.

◆ Function Display

	Appear when low power is selected.
CT	Appear when using CTCSS.
DCS	Appear when using DCS.
	Appear when plus duplex.
	Appear when minus duplex.
R	Appear when reverse function is activated.
☆	Appear when a channel number is locked out.
S	Appear when battery save function is ON.
APO	Appear when auto power-off function is ON.
	Shows receiving signal strength or the output power level.
	Display the operating frequency, menu item etc.
N	Appear when using narrow band.
	Display channel number.
	Indicate remaining battery power.
	Appear when lock function is activated.

■ BASIC OPERATION

◆ Power ON / OFF

Press and hold [POWER] to turn the power ON / OFF.

◆ Adjusting Audio Output Level

While pressing and holding [MONI], rotate the VOL switch to set the desired audio level.

◆ Channel Selecting

In channel mode, press [▲] \ [▼] or rotate the channel selector to select the desired channel.

◆ Transmit and Receive

Press and hold [PTT] to transmit, then speak into the microphone; release to receive.

◆ Key Lock Function

In standby mode, press and hold [MENU] for 2 seconds to lock or unlock the keypad.

■ MENU OPERATION

◆ Menu Mode

- ① Press [MENU] to enter into the menu mode;
- ② Press [▲] \ [▼] or rotate the channel selector to select the desired menu item, then press [MENU], the menu item number flashes;
- ① Press [▲] \ [▼] or rotate the channel selector to select the desired item value;
- ② Press [MENU] to keep the setting and return to the previous menu; press [PTT], [MONI], or [POWER] to return to the standby mode.

Menu Items:

No.	Menu Item	Function	Option	Default Setting	Page
1	STP.	Step	5/6.25/10/12.5/15/20/25/ 30/50/100KHz	25 KHz	
2	RT.	RX CTCSS	OFF/67.0~254.1Hz	OFF	
		RX DCS	OFF/023~754(N/I)	OFF	
3	TT.	TX CTCSS	OFF/67.0~254.1Hz	OFF	
		TX DCS	OFF/023~754(N/I)	OFF	
4	SFT.	Offset frequency direction	OFF/ +/-	OFF	
5	OFFSET	Offset frequency	0~99.995MHz	5 MHz	
6	REV.	Reverse	OFF/ON	OFF	
7	TXP.	TX Power	L (low) ; H (high)	H	
8	SQL.	Squelch level	0~9 level	5 level	
9	LED.	LED control	OFF/ON/AUT	AUT	
10	BP.	Beep	OFF/ON	ON	
11	ROG.	Roger	OFF/ON	OFF	
12	TOT.	Time-out timer	OFF/60/120/240S	60S (second)	
13	SAV.	Battery save	OFF/1~32 level	8 level	
14	APO.	Auto power-off	OFF/1~24 hours	OFF	
15	TX.	TX mute	OFF/ON	ON	
16	KY.	Key lock	MANU; AUTO	MANU	
17	BCL.	Busy channel lockout	OFF/BSY/RPT	OFF	
18	SCAN.	Scan mode	TO/CO/SE	TO	
19	DIS.	Power-on display	OFF/DC/MSG	DC (display voltage)	
20	MDF.	Memory name / frequency display	MN/FRQ	MN	
21	CHL.	Channel lockout	OFF/ON	OFF	
22	V/M.	Display mode	VFO/MR/CH	VFO	
23	MCH.	Channel memory	01~99CH	01CH	
24	VOX.	VOX	OFF/ON	OFF	
25	VXL.	VOX level	OFF/1~10 level	5 levels	

◆ Step

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item "STP", then press [MENU], the menu item value flashes;

- ② Press [▲] \ [▼] or rotate the channel selector to select the desired step from 5/6.25/10/12.5/15/20/25/30/50/100 KHz.

◆ **CTCSS / DCS**

In the same channel, communication is available among the radios which have been set the same CTCSS / DCS tone.

Set the RX CTCSS / DCS:

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item “RT”, then press [MENU], the menu item value flashes;

- ② Press [▲] \ [▼] or rotate the channel selector to select the desired RX CTCSS / DCS.

Set the TX CTCSS / DCS:

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item “TT”, then press [MENU], the menu item value flashes;

- ② Press [▲] \ [▼] or rotate the channel selector to select the desired TX CTCSS / DCS.

Note:

In CTCSS/DCS setting menu mode,

- Rotate the channel selector to select the signal code type below,
no signal code CTCSS norm DCS invert DCS no signal code
OFF -> CTCSS -> DCS N -> DCS I -> OFF

- While setting CTCSS, “CT” appears; while setting DCS, “DCS” appears.

Available CTCSS Tone Frequency (Hz) (50 Groups)							
67.0	85.4	107.2	136.5	165.5	186.2	210.7	254.1
69.3	88.5	110.9	141.3	167.9	189.9	218.1	
71.9	91.5	114.8	146.2	171.3	192.8	225.7	
74.4	94.8	118.8	151.4	173.8	196.6	229.1	
77.0	97.4	123.0	156.7	177.3	199.5	233.6	
79.7	100.0	127.3	159.8	179.9	203.5	241.8	
82.5	103.5	131.8	162.2	183.5	206.5	250.3	

Available DCS Codes (105 Groups)									
023	065	132	205	255	331	413	465	612	723
025	071	134	212	261	332	423	466	624	731
026	072	143	223	263	343	431	503	627	732
031	073	145	225	265	346	432	506	631	734
032	074	152	226	266	351	445	516	632	743
036	114	155	243	271	356	446	523	645	754
043	115	156	244	274	364	452	526	654	
047	116	162	245	306	365	454	532	662	
051	122	165	246	311	371	455	546	664	
053	125	172	251	315	411	462	565	703	
054	131	174	252	325	412	464	606	712	

◆ Offset Frequency

In VFO mode, offset frequency is available.

Set An Offset Direction:

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item "SFT", then press [MENU], the menu item value flashes;
- ② Press [▲] \ [▼] or rotate the channel selector to select the desired offset direction.
 "+" is higher than RX frequency,
 "-" is lower than RX frequency,
 "OFF" is no offset frequency.

Set An Offset Frequency:

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item "OFFSET", then press [MENU] to enter into offset frequency setting;

- ② Press [▲] \ [▼] or rotate the channel selector to select the desired offset frequency from 0–99.995MHz.

◆ Reverse Function

While the reverse function is activated, the TX frequency and RX frequency are interchanged, that is, use RX frequency to TX and TX frequency to RX. The CTCSS and DCS are also interchanged.

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item "REV", then press [MENU], the menu item value flashes;

- ② Press [▲] \ [▼] or rotate the channel selector to select the the reverse function ON or OFF.

Note:

- While changing channel or scanning, the reverse function will be auto-off.
- "R" appears while the reverse function is ON.

◆ TX Power

High or low power are selectable, for short distance communication, user may select low power to save the battery power.

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item "TXP", then press [MENU], the menu item value flashes;
- ② Press [▲] \ [▼] or rotate the channel selector to select the the TX power "H" (high) or "L" (low).
 - "LOW" appears while low power is selected.

◆ Squelch Level

The squelch is to mute the speaker when no signal is present. While opening the squelch, you will hear the background noise from the speaker; while closing, you won't hear it.

The selected squelch level determines how strong the signal must be for opening and closing the squelch. If the selected squelch level is too high, you won't hear weak signal; if too low, signal will appear in the background noise.

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item "SQL", then press [MENU], the menu item value flashes;

- ② Press [▲] \ [▼] or rotate the channel selector to select the desired squelch level from 0-9 level.

◆ LED Backlight

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item "LED", then press [MENU],

the menu item value flashes;

② Press [▲] \ [▼] or rotate the channel selector to select the LED backlight ON, OFF or AUT.

“OFF”: never lights.

“ON”: lights continuously while the radio is powered ON.

“AUTO”: lights for 10 seconds when any keys except [PTT] or [MONI] is pressed.

◆ Beep

Keypad Beep:

In menu mode,

① Press [▲] \ [▼] or rotate the channel selector to select the menu item “BP”, then press [MENU], the menu item value flashes;

② Press [▲] \ [▼] or rotate the channel selector to select the keypad beep ON or OFF.

Roger Beep:

It is TX end beep which can be heard by both transmitter and receiver.

In menu mode,

① Press [▲] \ [▼] or rotate the channel selector to select the menu item “ROG”, then press [MENU], the menu item value flashes;

② Press [▲] \ [▼] or rotate the channel selector to select the roger beep ON or OFF.

◆ TOT

To prevent accidental prolonged transmission, the radio has a time-out timer. This function cuts a transmission OFF after continuous transmission with a beep.

In menu mode,

① Press [▲] \ [▼] or rotate the channel selector to select the menu item “TOT.”, then press [MENU], the menu item value flashes;

② Press [▲] \ [▼] or rotate the channel selector to select the desired TOT time from OFF/60/120/240 seconds (OFF: TOT function is OFF).

◆ Battery Save

In menu mode,

① Press [▲] \ [▼] or rotate the channel selector to select the menu item “SAV.”, then press [MENU], the menu item value flashes;

- ② Press [▲] \ [▼] or rotate the channel selector to select the battery save OFF or battery save level from 1-32 level. “S” appears while the battery save function is ON.

◆ Auto Power-off

The radio can be set to automatically turn OFF after a specified period with a beep when no key operations are performed.

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item “APO.”, then press [MENU], the menu item value flashes;
- ② Press [▲] \ [▼] or rotate the channel selector to select the APO OFF or APO time 1-24 hours. “APO” appears while the APO function is activated.

◆ TX ON / OFF

When TX Mute function is activated, the radio can't transmit, but receive to save the battery power.

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item “TX.”, then press [MENU], the menu item value flashes;
- ② Press [▲] \ [▼] or rotate the channel selector to select the TX ON or OFF.

◆ Key Lock Function

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item “KY.”, then press [MENU], the menu item value flashes;
- ② Press [▲] \ [▼] or rotate the channel selector to select to the key lock MANU or AUTO.

- MANU: press and hold [MENU] for 2 seconds to lock or unlock the keypad.
- AUTO: auto-key lock when not any operation within 30 seconds. Press and hold [MENU] for 2 seconds to unlock.
- “” appears when key lock, all the others keys are not available besides [PTT], [MONI] and the channel selector.

◆ Busy Channel Lockout

This function can prevent user from interfering the communication of other radios. When the channel is busy, the radio will cut the transmission with a beep “di”.

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item “BCL.”, then press [MENU], the menu item value flashes;

- ② Press [▲] \ [▼] or rotate the channel selector to select the BCL OFF, BSY or RPT.

OFF: BCL OFF

BSY: when channel busy

RPT: when channel busy and incorrect CTCSS / DCS

◆ Scan Mode

Before scanning, please decide how to continue scanning after detecting and stopping for a signal.

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item “SCAN.”, then press [MENU], the menu item value flashes;
- ② Press [▲] \ [▼] or rotate the channel selector to select the desired scan mode.

There are the following three modes selectable.

- **Time-operated Mode (TO)**

The radio stops scanning when detecting a signal, remains there for 5 seconds, and then continues to scan even if the signal is still present.

- **Carrier-operated Mode (CO)**

The radio stops scanning when detecting a signal and remains there until the signal disappears. There is a 5 seconds delay between signal disappearing and scan resumption unless the radio detects a new signal during this time.

- **Search-operated Mode (SE)**

The radio stops scanning and pauses on the channel when detecting a signal, and remains there even if the signals has disappeared.

◆ Display Information When Power ON

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item “DIS.”, then press [MENU], the menu item value flashes;
- ② Press [▲] \ [▼] or rotate the channel selector to select the desired display information OFF, DC or MSG.

OFF: display information OFF

DC: display battery voltage

DIS: display information ON

- While select MSG, the display information is PC programmable.

◆ Memory Name

Channel number or memory name display in CH mode is available.

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item "MDF.", then press [MENU], the menu item value flashes;
- ② Press [▲] \ [▼] or rotate the channel selector to select the desired display MN or FRQ.
 - MN: display memory name; FRQ: display channel number.
 - The memory name is PC programmable.

◆ Memory Channel Lockout

This function is to avoid accidental deletion.

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item "CHL.", then press [MENU], the menu item value flashes;
- ② Press [▲] \ [▼] or rotate the channel selector to select the memory channel lockout ON or OFF.
 - "★" appears when this function is activated.

◆ Standby Display Mode

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item "V/M.", then press [MENU], the menu item value flashes;
- ② Press [▲] \ [▼] or rotate the channel selector to select the desired display mode.
 - There are three standby display modes:
 - VFO mode: full-frequency mode
 - MR mode: frequency memory mode
 - CH mode: channel mode

◆ Channel Memory

In VFO mode, the parameters setting like frequency, CTCSS/DCS, power etc. are available.

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item "MCH.", then press [MENU], the menu item value flashes;

- ② Press [▲] \ [▼] or rotate the channel selector to select the desired memory channel number.
- ③ Press [menu] to confirm the memory.

◆ VOX

When VOX function is activated, user can transmit by voice without press and hold [PTT].
In menu mode,

VOX ON/OFF:

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item "VOX.", then press [MENU], the menu item value flashes;
- ② Press [▲] \ [▼] or rotate the channel selector to select the VOX ON or OFF.
 - "VOX" appears while VOX ON.

VOX Level:

In menu mode,

- ① Press [▲] \ [▼] or rotate the channel selector to select the menu item "VOL.", then press [MENU], the menu item value flashes;
- ② Press [▲] \ [▼] or rotate the channel selector to select the desired VOX level from OFF/1-10 level.

■ RESETTING FUNCTION

While pressing and holding [MONI], [UP], turn power on to enter into the initial set mode, "DEL.CH?" appears; In the initial set mode, press [▲] \ [▼] or rotate the channel selector to select the desired menu item, then press [MENU] to enter into the setting.

◆ Delete Memory Channel

Delete a memory channel, "DEL.CH?" appears.

- ① Press [▲] \ [▼] or rotate the channel selector to select the desired memory channel;
- ② Press [MENU], "SURE?" appears;
- ③ Press [MENU] to confirm the deleting;
- ③ After deleting, it turns to the next memory channel which is waiting for deleting, if all channels have been deleted, it returns to the previous menu;
 - If there is no memory channel, it is not available for entering into this menu.

◆ VFO Reset

VFO reset, "VF.RST?" appears.

- ① Press [MENU], "SURE?" appears;
- ② Press [MENU] again, "WAIT" appears, the radio auto-power on after VFO reset.

◆ Full Reset

Full reset, "FL.RST?" appears.

- ① Press [MENU], "SURE?" appears;
- ② Press [MENU] again, "WAIT" appears, the radio auto-power on after full reset.

◆ Cloning

- ① Connect the cloning cable to the SP/MIC jack of the master and sub-radio.
- ② The master radio enters cloning mode, "CLONE?" appears, then press [MENU] to confirm;

- ③ After cloning, "OK" appears, the radio auto-returns to the cloning mode for next cloning after 1 second; "ERROR" appears if fail to clone.

◆ VFO Frequency Range Setting

VFO frequency range setting, "P.VFO?" appears.

To limit the operation frequency range, user can set the upper limit and lower limit frequencies for the VFO parameter.

The lower limit frequency appears in the left of display screen, the upper limit frequency appears in the right.

For example, the lower limit frequency is 450MHz, the upper limit frequency is 470MHz, then the frequency range is 450-470MHz.

- ① Press [▲] \ [▼] or rotate the channel selector to select the lower limit or upper limit frequency;
- ② Press [MENU] to switch to the upper limit frequency;
- ④ Press [MENU] again to keep the setting and return to the previous menu.
